

2011.2.19 (SAT) 10:00 – 18:00

Promoter:

Consortium for the interdisciplinary study of human and nature symbiosis in island systems

The interdisciplinary workshop on sustainable symbiosis of human and nature from the view point of "Island study"

“The Consortium for the interdisciplinary study of human and nature symbiosis in island systems” is an interdisciplinary research group aiming to study symbiosis between human and nature using “islands” as model systems. In order to create an international network for this research group, we have decided to host a small international workshop in Tokyo. Our aim for this workshop is to discuss the natural, cultural and socio-economical terms for sustainable symbiosis of human and nature.

The details for the workshop are:

【Date】 2011.2.19 (Sat) 10:00 – 18:00

【Place】 TMU Akihabara satellite campus (12F)

(http://www.akibahall.jp/data/access_eng.html)
